

*The Fantastical  
Lost Continent of  
McNuggetopia*

**2.** Seismic stations in cities A, B and C have recorded the arrival times of P waves and S waves from another recent earthquake.

The seismologists once again used their Earth Science Reference Tables to calculate the distance to the epicenter from each station.

Use their data (and your compass) to find the location of the earthquake epicenter.

Station	Distance
A	7400 km
B	4500 km
C	5000 km

1 cm = 1000 kilometers
